Gane Coverboard

Tech Sheet #2053 Sample Card #04450

Issued 05/14/2018

Gane Premium Black Board **Rich black, low-density, ultra-smooth**

Overview

Gane Premium Black Board is a low-density three-ply board product designed with performance in mind. It is manufactured with the same process as our Gane Coverboard (Graphic Board, Euro Board.) It features an ultra smooth finish with exceptional lay flat properties. Produced on Fourdrinier paper making equipment, its shorter and more uniformly distributed fibers as well as control in the production process assure superior warp resistance to black chip products. Gane Premium Black Board is made from 100% recycled paper. The board is constructed of three elements: the core, which accounts for 60% of the total caliper, and two outer layers, which make up the remaining 40% of the boards caliper (20% each).

Information

- Smooth finish
- Rich black color
- Exceptional lay flat
- Thickness - .040"
- Standard sheet sizes: various - please contact us for more information
- Other thickness' and sheet sizes available
- On-site conversion for custom cut-to-size pieces

Features

- Exceptional lay flat properties
- Lightweight yet rigid product
- Greater yield per ton than high-density board products
- Made from recycled paper
- Compostable and recyclable

Manufacturing Techniques

Acceptable gluing includes: Animal, Polyvinyl Acetate (PVA) and Hot Melt

Decorating Techniques

- Foil Stamping
- Screen Printing
