M-12 Release Cote

Tech Sheet #2192 Sample Card #N/A

Issued 07/01/2015

M-12 Release Cote Liquid shield against adhesive buildup

Overview

M-12 Release Cote is designed to act as a shield against adhesive build-up. When applied to glue pots or tanks, the surface will repel the adhesive, making clean up a breeze. A thin film of Release Cote is all it takes to prevent build-up on virtually any industrial surface. Release Cote is extremely easy to use: simply apply the product using the convenient spray can, or with a rag or brush. Release Cote works on much more than glue and adhesives; it will repel a wide range of coatings, plastics, inks, paints, varnishes and much more. Release Cote may be applied to spray booth walls, tanks, ink fountains, machinery or virtually any exposed surface where build up can occur.

Information

- Liquid release agent
- Put up:
 - 16 ounce spray can; 6 cans per carton
 - 1 gallon can; 4 gallons per carton
 - 5 gallon pail
- Weight:
 - 16 ounce spray can - 1.04 pounds per can
 - 1 gallon can - 8.6 pounds per can
 - 5 gallon pail - 41.6 pounds per pail
