

## Clear Vinyl Film

### Transparent vinyl film in a variety of finishes and thickness'

#### Overview

Gane offers a wide selection of clear vinyl products. Double polished clear vinyl offers a smooth and glossy transparent finish, and is available in thicknesses of .006, .0075, .008, .010, .012, and .016". It is also available in the slightly textured "Orange Peel" finish in thicknesses of .007". The double polished clear utilizes "special slip" formulation, which prevents the pieces of vinyl from sticking together. Frosty Matte finish clear vinyl features a more natural vinyl finish. It has a dull, frosted finish that is partially transparent. Frosty Matte finish clear vinyl is available in thicknesses of .006, .0075, .008, .010, and .012" Gane also offers the Press Polished line of vinyl, which is thicker than the other clear vinyl products. Like the double polished, these items are glossy and clear. The Press Polished clear vinyl is perfect for applications which require a heavy duty vinyl product, such as rear windows on convertible tops, or handles for large sample books. Press Polished clear vinyl is available in two variations: "firm" and the more pliable "soft" vinyl.
